1. EXECUTIVE SUMMARY & MANAGEMENT CONTEXT

Opticom Finance Limited (RC: 347832) has implemented an end-to-end autonomous underwriting and credit lifecycle engine. This platform automates the transformation of commercial loan origination from manual, fragmented spreadsheets and paper memos into a deterministic, secure, and auditable digital pipeline running strictly within Opticom's enterprise boundaries.

Key Executive Value Propositions:

- **Zero Hallucination Guarantee:** All financial metrics (DSCR, DTI, PMT, Amortization, Fees, Stress Tests) are calculated strictly by a deterministic Python engine outside the AI layer.
- **Official 12-Page Opticom CAM:** Google Cloud Vertex AI Gemini automates narrative synthesis into the official corporate Credit Appraisal Memorandum format, citing verified bank statements and CAC incorporation documents.
- **Canonical Governance & Multi-Tier Segregation:** Strict Role-Based Access Control (RBAC) ensuring Credit Analyst recommends, HRM synthesizes, Head of BD commercial reviews, and final sanction routes deterministically to MD (≤ ₦20M) or BCC (> ₦20M).
- **Integrated Master Fee Schedule & Bespoke Inclusions:** Full transparency of statutory fees (Stamp Duty 0.125%, FIRS VAT 7.5% on service fees) and customizable bespoke fees with live net disbursement simulation.
- **Core LMS Synchronization:** Native 1-click booking into Opticom's core LMS (LOAN-DISC / Xloandisk) with NAV settlement ledger voucher generation and replay prevention.

2. ENTERPRISE SYSTEM ARCHITECTURE & INTAKE GATEWAYS

Gate 1: BESTO Retail Partner Ingestion (≤ ₦2,000,000)

High-volume consumer & micro-commercial facilities up to ₦2.0M ingested via secure HMAC-SHA256 authenticated REST webhooks. Includes reuse of BESTO KYC and automated quarantine for suspicious payloads.

RETAIL GATEWAY | HMAC-SHA256 SECURED

Gate 2: OFL Direct Commercial Portal (> ₦2,000,000)

Institutional front-door for SME and corporate clients from ₦2,000,000.01 up to ₦50M+ single obligor limit. Features bank statement OCR upload, CAC documentation, and live 28% APR commercial repayment sizer.

3. THE OPTICOM APPROVAL LIFECYCLE (PRD SECTIONS 6, 7 & 17)

The platform enforces Opticom's approved multi-tier governance matrix. Every credit case follows this strict sequential chain with role-segregated queues:

1 Application Intake & Identity Verification (Youverify Gateway)
Borrower or BDO submits facility request with 6-month bank statements, CAC certificate, and board resolution. Youverify automated API verifies BVN, NIN, RC status, and conducts PEP/Sanctions screening.

2 Credit Analyst Underwriting & Financial Spreading
Analyst evaluates verified bank turnover, spreads financials, executes deterministic ratio calculations (DSCR ≥ 1.30x, DSR ≤ 40%), validates collateral coverage (≥ 1.20x), and submits recommendation to HRM.

3 Head of Risk Management (HRM) — CAM Synthesis
HRM triggers Vertex AI Gemini to generate the 12-page official Credit Appraisal Memorandum (CAM). HRM reviews risk covenants, stress testing matrices, and routes the case to Head of Business Development.

4 Head of Business Development — Commercial Review & Sanction
Head of BD evaluates the commercial rationale, client relationship history, repayment dynamics, and interest margin. Upon commercial recommendation/approval, the case returns to HRM for final risk concurrence.

5 HRM Concurrence & Escalation to Final Executive Authority
HRM reviews BD's commercial recommendations. Upon risk concurrence, the engine checks the facility amount against Opticom's deterministic sanction thresholds:

Path A: Facilities ≤ ₦20,000,000 (MD Sanction)
Case routes to **Managing Director (MD)**. MD grants final executive approval, automatically advancing case to `Offer Pending` and notifying Finance and Loan Operations.

Path B: Facilities > ₦20,000,000 (BCC Sanction)
MD reviews and endorses facility, escalating it to the **Board Credit Committee (BCC)**. BCC Chairman and Committee members grant final board sanction, triggering offer generation.

6 Offer Letter Generation & Conditions Precedent Clearance
System generates formal facility Offer Letter with itemized Master Fee Schedule. Credit Operations verifies satisfaction of Conditions Precedent (e.g. registered mortgage, comprehensive insurance, promissory notes).

7 Treasury 1-Click LOAN-DISC / Xloandisk Booking & NAV Settlement
Treasury Lead executes 1-click disbursement: books loan into core LMS (LOAN-DISC / Xloandisk), generates NAV accounting voucher (e.g. `NAV-DISB-XXXX`), and logs SHA-256 audit entry.

4. OPTICOM DELEGATED AUTHORITY MATRIX (DETERMINISTIC LIMITS)

PERSONA ROLE	DESIGNATED AUTHORITY	APPROVAL LIMIT (₦)	GOVERNANCE RESPONSIBILITIES
Credit Analyst	Recommend & Review	Up to ₦2,000,000 (Recommend Only)	Bank statement spreading, DSCR/DTI ratios, collateral analysis
Head of Risk (HRM)	Risk Review & Synthesis	Up to ₦5,000,000 (Initial Risk Sign-off)	12-page CAM synthesis, covenant structure, routing to BD & MD
Head of Business Dev	Commercial Sanction	Commercial Review & Endorsement	Market validation, client relationship, commercial pricing
Managing Director (MD)	Highest Executive & Admin Authority	**Up to ₦20,000,000 (Final Sanction)**	Final facility sanction ≤ ₦20M; full admin oversight across platform
Board Credit Committee (BCC)	Board Credit Committee	**Over ₦20,000,000 (Board Sanction)**	Final board sanction for enterprise facilities exceeding ₦20M
Treasury Operations	LOAN-DISC & Settlement	Execution & Core LMS Booking	Conditions precedent check, NAV voucher, LOAN-DISC sync

5. CENTRAL BANK OF NIGERIA (CBN) BENCHMARK & COMMERCIAL PRICING

The platform centralizes all pricing formulas in **Tab 6: Fee Schedule & Bespoke** under System Configuration. In full compliance with CBN regulatory benchmarks, commercial interest rates are derived deterministically:

ACTIVE COMMERCIAL LENDING FORMULA

CBN MPR (23.00%) + Commercial Risk Spread (5.00%) = 28.00% APR

Monthly Equivalent Rate: **2.33% / month** on reducing-balance amortization.

CBN MONITORED
